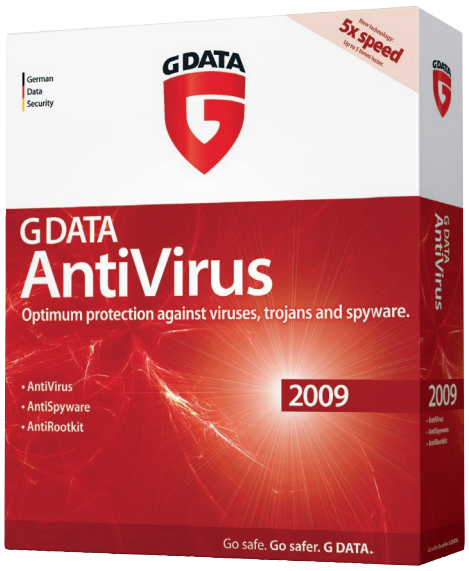
Product Information

G DATA AntiVirus 2009



Record award winner G DATA is raising the bar, with compelling new innovations, smart new developments and even better performance. Thanks to new DoubleScan technology including Fingerprinting and ParallelScan, G DATA AntiVirus 2009 is now up to 5 times faster, thus providing 100%, permanently updated protection for your computer.

All-round security

- Protects all channels of communication (e-mail [POP3/IMAP], instant messaging [MSN, Yahoo, AOL, etc.], HTTP)
- Improved protection against viruses, worms, rootkits, spyware, diallers, trojans, backdoors and much more
- Scans all compressed files and archives
- Resource-saving new user interface

Cutting edge technology

- DoubleScan: the best award-winning virus detection
- OutbreakShield: immediate protection against new viruses
- Fastest reaction to new virus attacks
- Also for 64-bit Windows systems
- RootkitScanner finds loaded rootkits

High-tech, fully-automated

- Email virus blocker for Outlook, Outlook Express, Mozilla, Eudora and many others
- Virus blocker for instant messaging (MSN, Yahoo, AOL, etc.)
- Automatically scans HTTP traffic
- System protection monitors registry and hosts file
- Fully automatic virus scans and updates

Updates & PremiumSupport

- New detection updates every minute
- Virus signatures, software updates and upgrades for one year included
- 24/7 service hotline at local rates
- InternetAmbulance analyses suspicious files

What's *NEW:*

- Fingerprinting - saves time and prevents unnecessary virus scans
- ParallelScan - considerable time savings for DualCore or Quad-Core PCs by distributing the load during virus scans
- Up to 5 times faster, thanks to new DoubleScan technology including Fingerprinting and ParallelScan
- Behaviour monitoring and heuristics: malware is detected even if signatures miss it
- Automatic customisation of security levels and speeds
- Old security software automatically uninstalled
- New intuitive user guidance

System requirements:

- PC with Windows Vista (32/64Bit), WindowsXP from SP2 (32/64Bit) or Windows 2000 from SP4 (32/64Bit)
- From 128 MB RAM
- Internet access
